PROFESSIONAL SUMMARY

I'm a Commerce graduate making a career shift into Front-end Development. With a passion for building visually appealing and functional web applications, I've been diving deep into HTML, CSS, and JavaScript. I am currently expanding my knowledge through various online courses, including Front-end Development and Java.

My goal is to become a strong software engineer, and I'm actively learning new frameworks and tools such as Bootstrap, Tailwind, Typescript, React, and Next.js. I thrive on solving problems and bringing designs to life. I'm open to collaborating on projects and am eager to contribute to dynamic teams.
